

Annual CCR Fugitive Dust Control Report

A.B. Brown Generating Station

December 11, 2018

40 CFR §257.80(c) Annual Fugitive Dust Control Report

The owner or operator of a CCR unit must prepare an annual CCR fugitive dust control report that includes a description of the actions taken by the owner or operator to control CCR fugitive dust, a record of all citizen complaints, and a summary of any corrective measures taken.

The A. B. Brown Generating Station has not received any citizen complaints regarding CCR fugitive dust since the prior Annual CCR Fugitive Dust Control Report was prepared on December 12, 2017.

Prince Seal, a polymer emulsion product manufactured by Prince Seal, is used to seal the ash pond. Sealing work began November 26, 2018 and is scheduled to be completed in December 2018. Commencement of the sealing work began later in the year due to a wet fall season, and investigative work on the pond (i.e. drilling and sampling) that would have compromised the integrity of the seal.
