

Annual CCR Fugitive Dust Control Report

A.B. Brown Generating Station

December 7, 2022

40 CFR §257.80(c) Annual Fugitive Dust Control Report

The owner or operator of a CCR unit must prepare an annual CCR fugitive dust control report that includes a description of the actions taken by the owner or operator to control CCR fugitive dust, a record of all citizen complaints, and a summary of any corrective measures taken.

The A.B. Brown Generating Station has not received any citizen complaints regarding CCR fugitive dust since the prior Annual CCR Fugitive Dust Control Report was prepared on December 9, 2021.

Water trucks are being utilized to control dust. Soil Sement, a polymer emulsion product used to seal the ash pond was ordered in October 2022. Order fulfillment and delivery is taking longer than expected. The contractor who will apply the material is prepared to perform this work upon delivery of the material.
