

CenterPoint Energy can save you money and energy with solar

CenterPoint Energy provides incentives to participating service providers who install solar photovoltaic systems on homes within CenterPoint's electric territory. These incentives help offset the initial cost of installation, so CenterPoint customers can see a quicker return on investment.

Participate with CenterPoint in five easy steps:

STEP 1

Register with CenterPoint

STEP 2

Determine DC system size

STEP 3

Create PV watts report

STEP 4

Label CenterPoint incentive on invoice

STEP 5

Submit application to CenterPoint

Installation qualifications:

- Service company must register with CenterPoint Energy
- Must be a new installation on a residential meter
- Customer must sign an interconnection agreement

Customer incentives:

\$135/kW*

*per rated DC system size, incentives capped at 15 kW
